

ENVIRONMENTAL POLICY

SILON Compounds Ltd. is committed to and consciously strives to minimize the impact of our operations on the environment.

We are committed to:

- Continually improving our Environmental Management System;
- Considering the environment and resource conservation for all new and existing products and processes;
- Providing information on environmental risks to all interested parties;
- Working with customers, carriers, suppliers and contractors to foster the safe use, transportation, and disposal of chemicals and plastic material;
- Operating our facility in a manner that protects the environment, in compliance with all applicable legal requirements, to minimize damaging impacts as a result of our activities;
- Incorporating environmental consideration into all business decisions including expansion and renovation;
- Only using resources in the most efficient ways.
